DETAILED ACTION

Drawings

1. The drawings are objected to because the lines are not uniformly thick and well defined.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Glaesener (U.S. Patent 3,704,861). Glaesener discloses a block (Figure 5, for example) having a thermoplastic and rubber composition (column 6, lines 25-47, for example).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marinelli (U.S. Patent 6,007,269) in view of Ackerman (U.S. Patent 3,493,213). Marinelli discloses a generally rectangular block (12) of polymer having means for supporting a guard rail thereon

Art Unit: 3671

(Figure 2, for example). There is a bore (Figure 2) through the block and a side tab (22). There is no top positioning tab. Ackerman discloses a spacer block including a top positioning tab (5). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the tab of Ackerman with the block of Marinelli in order to ease installation, as taught by Ackerman.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references teach spacer blocks.
